

Changing Flash Settings In Chrome:

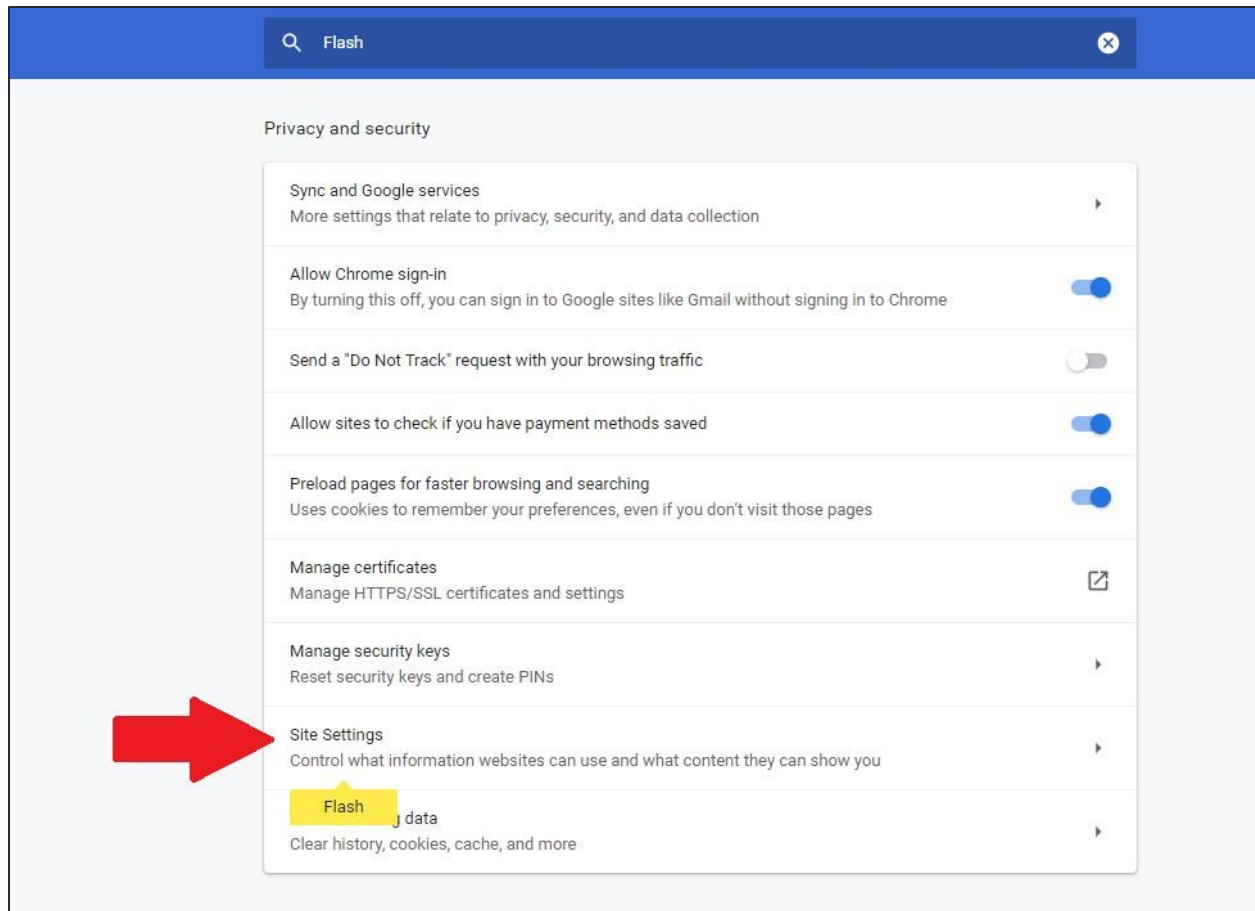

Go to the three dots on the top right part of the screen. Then click Settings.

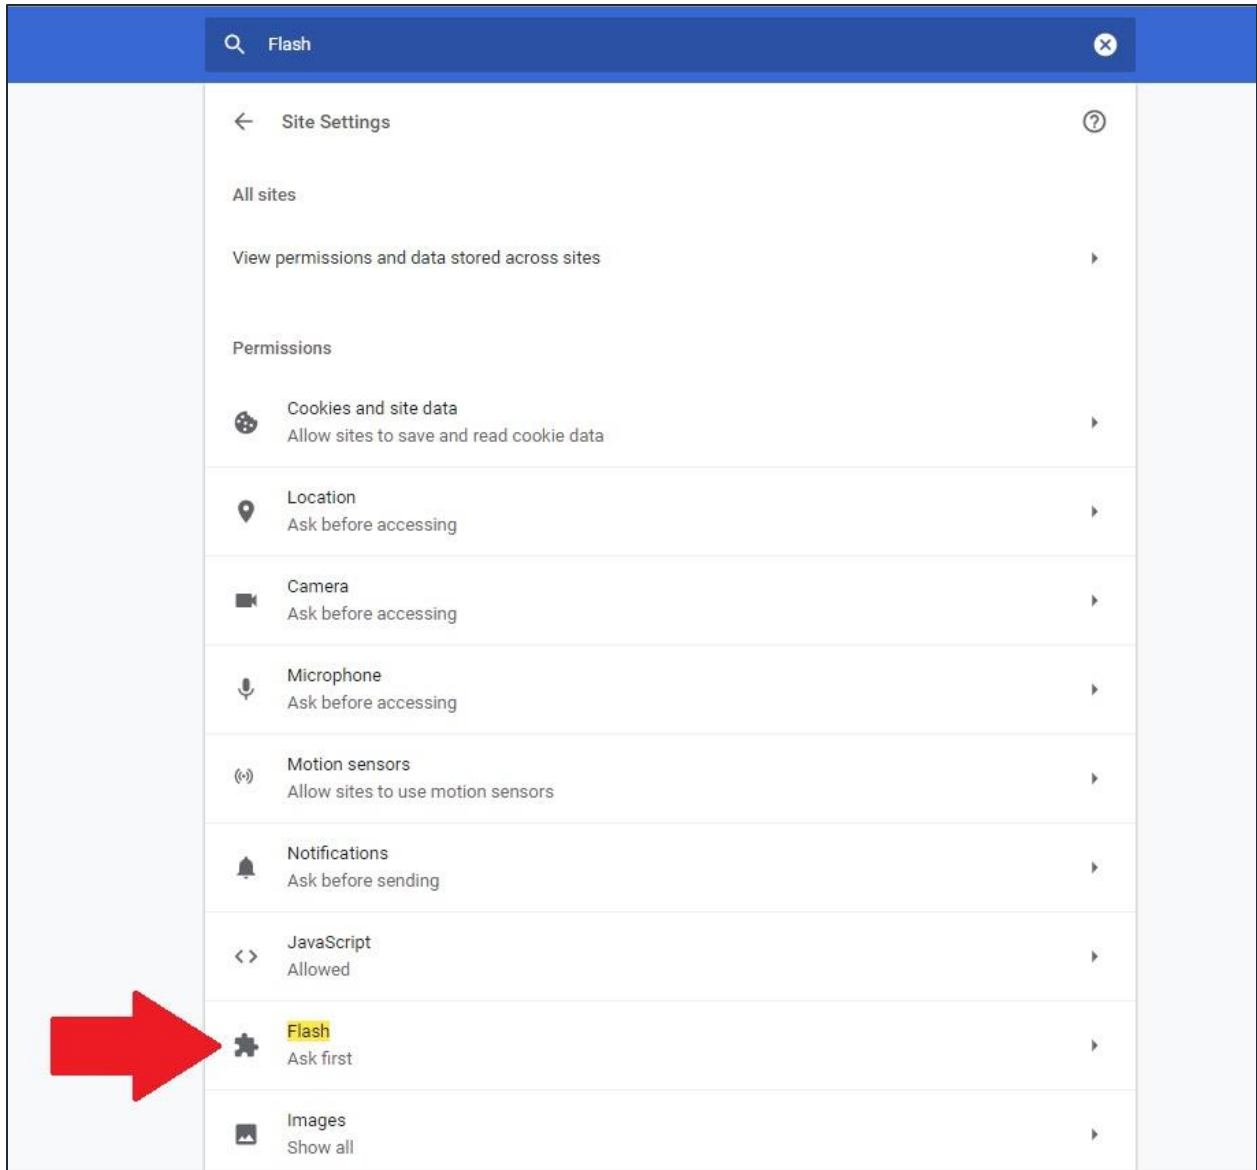

On the screen that comes up, go to the "Search Settings" area and type "Flash."

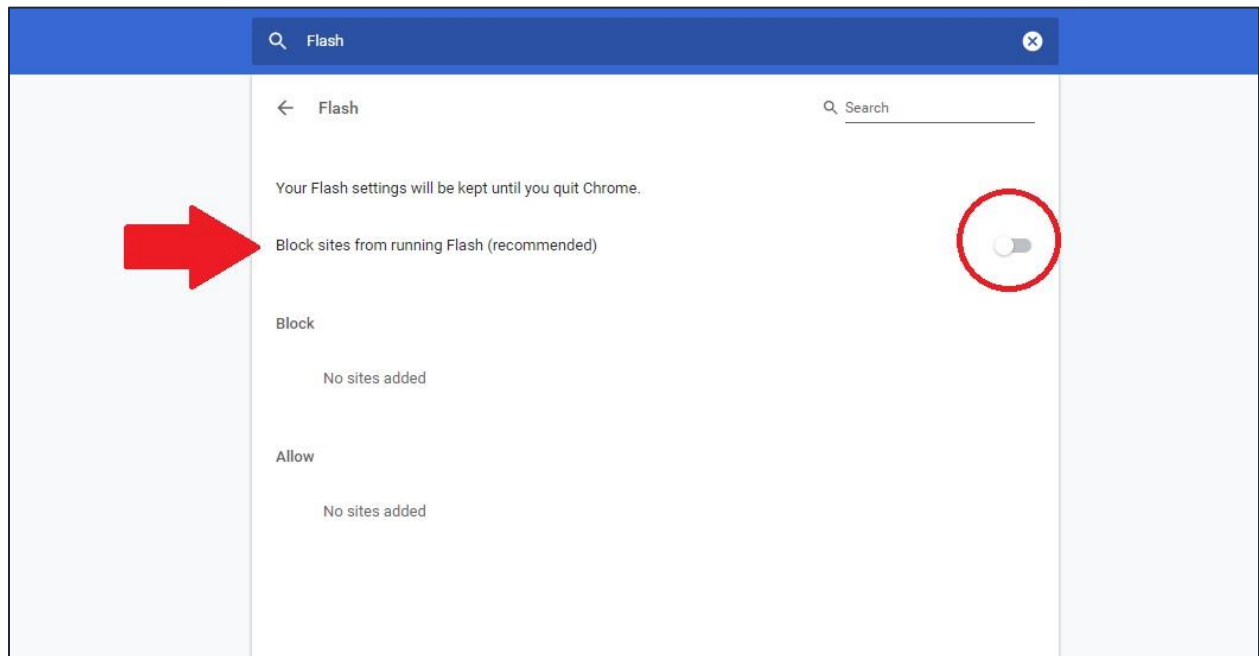

Then Click On "Site Settings."

Next click on "Flash."

The last step is to toggle the switch from "Block sites from running Flash" to "Ask First." This is done by clicking the little button on the side (circled below):

Once this is done Flash videos will play again in Chrome.
